

Characteristics:

General Description:

The single channel DIN Rail Repeater Power Supply and Trip Amplifier D1054S, provides a fully floating dc supply for energizing conventional 2 wires 4-20 mA transmitters, or separately powered 3, 4 wires 4-20, 0-20 mA transmitters located in Hazardous Area, and repeats the current in floating circuit to drive a Safe Area load. Output signal can be direct or reverse.

The circuit allows bi-directional communication signals, for Hart-Smart transmitters. Two independent Alarm Trip Amplifiers are also provided. Each alarm energizes, or de-energizes, an SPST relay for high, low, low-startup or burnout alarm functions. The two alarm relays trip points are settable over the entire input signal range.

Function:

1 channel I.S. analog input for 2 wires loop powered or separately powered Smart transmitters, provides 3 port isolation (input/output/supply) and current (source mode) or voltage output signal.

In addition it provides two SPST relay alarm contacts with adjustable alarm trip point.

Signalling LEDs:

Power supply indication (green), burnout (red), alarm A (red), alarm B (red).

Configurability:

Totally software configurable, no jumpers or switches, mA or V output signal, linear or reverse, alarm trip point, high, low, low-startup or burnout alarm mode, NE/ND relay operation, hysteresis, delay time, by GM Pocket Portable Configurator PPC1090, powered by the unit or configured by PC via RS-232 serial line with PPC1092 Adapter and SWC1090 Configurator software.

To operate PPC1090 or PPC1092 refer to instruction manual.

Smart Communication Frequency Band:

0.5 to 40 KHz within 3 dB (Hart and higher frequency protocols), only with mA direct current output.

 Setting this value outside the measuring range will disable this function.
Burnout High: high burnout condition trip point value;
 above this value a burnout fault condition is activated and the analog output is driven to the configured state (see Burnout in Output Section).
 Setting this value outside the measuring range will disable this function.
